16 NOV 1988

9 November 1988

MEMORANDUM FOR: Edward J. Maloney

FROM: [REDACTED]

SUBJECT: Federal Conference on Computer Support

RE: Request for additional information

Enclosed are copies of the brochures that [REDACTED] and I received at the 1988 Federal Conference on Computer Support for Handicapped individuals. As you know from the last NSG weekly report, the Agency's Physically Challenged Employees Resource Information Center (PCERIC) was highlighted by Susan Brummel, from the Clearing House on Computer Accommodation, GSA. She emphasized that the Agency was taking a lead role in providing accommodation devices and assistance to the employees in need of them. She described our focus on commercially available products, especially those that were PC-based. Our efforts toward hosting a well-orchestrated Adaptive Technology Awareness Day last March were also described for the audience.

Several vendors were on hand to display their adaptive devices. Bobby and I reinforced several contacts that he had established in the past.

If you would like further information on this conference, please feel free to contact me [REDACTED]
